

## Run The Application

Team ID	PNT2022TMID00521
Project Name	Smart Lender - Applicant Credibility Prediction for Loan Approval

1. Open the anaconda prompt from the start menu
2. Navigate to the folder where your python script is.
3. Now type “python app.py” command

The screenshot shows a Visual Studio Code window with a terminal open. The terminal output indicates that the Flask application 'app.py' is running on http://127.0.0.1:5000. The output includes a warning about using a development server, the running URL, and a message about the debugger being active. A test request is also shown: '127.0.0.1 - - [19/Nov/2022 09:51:28] "GET / HTTP/1.1" 200 -'.

```
PS C:\Users\kotha\OneDrive\Desktop\Loan prediction ML model> python app.py
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with watchdog (windowsapi)
* Debugger is active!
* Debugger PIN: 143-753-388
127.0.0.1 - - [19/Nov/2022 09:51:28] "GET / HTTP/1.1" 200 -
```

4. Navigate to the local host where you can view your web page.
